

Figure 1: Left: Partial and whole spherical linkage of a mesh in Fig. ??, $(\lambda_i, \gamma_i, \mu_i, \delta_i, \alpha_i, \beta_i)$ and $(\lambda'_i, \gamma'_i, \mu'_i, \delta'_i, \alpha'_i, \beta'_i)$ are complementary to π respectively, the gap between β_1 and α_2 is caused by τ_1 and ζ_1 .
